QUESTIONS AND ANSWERS

T201306701.01

MICRO-SURFACING B, NORTH DISTRICT, FY13-FY14, NEW CASTLE COUNTY

Friday, July 26, 2013

Q #	Question	Answer
4	When is the last day and time that we can ask questions?	Answers to questions can be expected if questions are received 6 working days prior to bid date.
3	Item 748548- Permanent Pavement Striping Epoxy Resin Paint. Does typical application 17A/17/B from Part 6 of the Delaware MUTCD apply for striping operations? Will any detours be required when the road width is too narrow to permit the use of 17A/17B?	All traffic operations are dictated by the DEMUTCD, as such, particular applications relating to construction operations will follow this manual and should be considered accordingly.
2	Item 748530- Removal of Pavement Striping. Would grinding machines be permitted for striping removal of latex/glass beads and epoxy resin lines? Is this item requiring total eradication of lines, not just scuffing of paint lines?	See response to question 1.
1	Item 403510- In the current Contract T201306701.01 North, there is no specified application rate given for the micro-surfacing. As in all past DelDOT contracts for North, Canal and South projects, it has been specified and applied at a minimum 30 lbs/sy double application for type II Aggregate Gradation. Will this be the same case as for this Contract?	We are adjusting standard spec for 403510 which will take care of Q1 and Q2. That will be in the form of an addendum.
